

Peru brings years of commercial & supplier experience allied with a deep knowledge of risk assessment methods to help clients identify the supply chains most critical to their own products & services, ask the right questions to assess risk effectively, and accurately gauge levels of risk exposure.

Does your organisation....

- Lack a clear view of your **supply chain risks**?
- Wish to move from reacting to risk to **tracking & acting**?
- Have challenges identifying **emerging risk patterns**?
- Need to assess where your potential **risk hot spots** are?
- Want to **better understand** who you are doing business with?

Supply Chain Risk Assessment

Our experienced team can help you implement **effective, sustainable improvements** to your supply chain risk management strategy that enable you to **proactively assess** your supply chain risk.

The approach is based on a **3-stage process** which first analyses the **supplier influence** in terms of impact on revenue, profitability and/or outputs, then assesses the **probability and impact of supplier risks** across a range of critical business dimensions, and finally **aggregates the risk rating of all suppliers** across these dimensions to provide a consolidated **Supplier Vulnerability Assessment** for your organisation.

The assessment output is tailored to your organisation's needs and **provides insight at an aggregate, individual supplier, and/or supplier dimension level**. This insight provides the critical foundation for mitigation plans. The approach is supported by a flexible toolset which streamlines the process.

What could your future look like?

- Evolve from reacting to supplier risk to **proactively tracking & acting** on it
- Focus finite risk resources on the supply types **most critical** to your organisation
- Gain the **clearest insight** on risks in your supply chain by asking the **right questions**

Service Outcomes

- We, as your trusted advisor, can help you to greatly **strengthen your business resilience** through robust third party risk management.
- Our risk analysis process can empower you to plan risk mitigation and provide **first responder advantage** in future times of disruption.
- Our risk management expertise, allied with our detailed process and automated tooling, can maximise **efficiency & effectiveness** of your own risk practitioners.
- Our experienced professionals bring a deep knowledge of **supplier risk management** to help you **plan and prioritise** your risk management approach

"Due to the increasing complexity of Musgrave's IT Supplier model, greater discipline and a proactive joined up approach was required. Peru provided the tools and disciplines to develop a proactive model for Supplier Management"

Paul Baguley, Head of PMO , Musgrave

Approach

Based on our experience of supply chain risk we follow a 3-stage approach:

Determine Supply Chain Influence

- We will work with you to **identify** the supply chain categories you need to focus on
- Our automated ranking process will identify your **risk hot spots** based on profiling

Capture Supplier Risks

- We segment risks into categories and use an automated risk diagnostic process to generate a report containing **prioritised key lines of enquiry** for your risk review

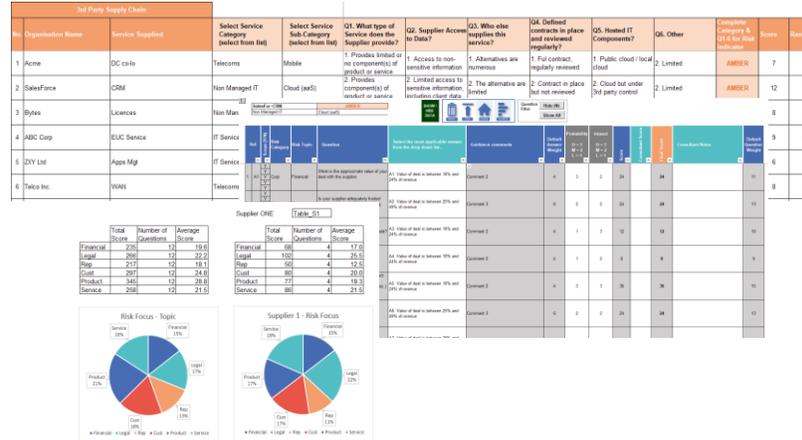

Rank and Assess Risks

- We follow a **rigorous process** for risk assessment, which enables you to tailor the detail of your risk ranking
- Our process is underpinned by our **automated risk assessment tool**
- Our risk assessment & tooling drives a risk report which can be interrogated to review a specific category of suppliers and supply risks or present an **overall consolidated risk position** for your organisation

Engagement & Commercial

Advisor-led insight:

- Our **advisor-led approach** in the initial engagement allies the power of the risk assessment tool with the **insight** of our experienced practitioners
- The scope of your supply chain risk assessment will determine the timescales for the engagement: a short, focused risk review can be completed in **3-4 weeks**
- Our review can focus on a single supply area, single risk domain or combinations of both

A commercial model that works for you:

We offer a **flexible** range of commercial models aligned to your financial & risk requirements:

- Fixed price, based on scoped outcomes
- Time & materials
- Risk as a Service (RaaS) model

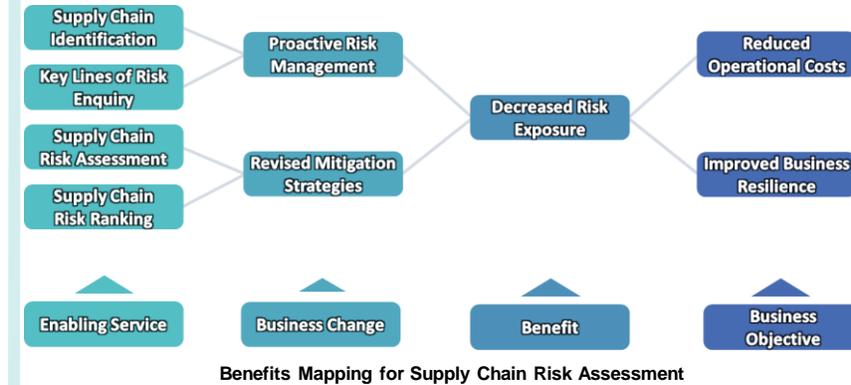

Outcomes

Outcomes aligned to your key objectives:

Benefits focused outcomes

- We work with you to identify your key supply chain risk **objectives** e.g. understanding supplier concentration risks or operational risks
- We identify outcomes expressed in benefits e.g. **proactive risk management** that drive achievement of objectives
- Our **expert advisors** help you realise benefits by guiding you through the risk assessment process

Actionable outcomes

- We work alongside your existing risk management teams to **share best practice in a sustainable way**
- We provide clear **risk insight** to drive improvements in your supply chain risk assessment process
